Power and innovation for a secure desktop-like experience

HP Compaq t5720 Thin Client

HP Thin Clients set the standard for proven technology and secure systems that are easy to deploy and manage. With a high-performance AMD processor and a range of innovative features the new HP Compaq t5720 Thin Client is the industry's most powerful desktop alternative.

Why go thin?
Thin clients are centralised, server-based solutions designed to make your business leaner and more efficient. Centralised management and streamlined components mean new applications and upgrades only need to be installed once making deployment simple and affordable. With no local data or removable media they are also ultra-secure functioning only when connected to the host server.

High-performance technology
Made possible thanks to an innovative new convection cooling system the HP t5720 features an AMD Geode NX 1500 processor to deliver genuine desktop-like power. Additional performance and flexibility are provided by SiS 741 GX integrated UMA graphics with 16 MB shared graphics memory, 512 MB of Flash memory and a choice of 256 MB or 512 MB DDR RAM.

Increased desktop space with a versatile new design feature
This unique chassis can be combined with the new HP Quick Release - a versatile and easy-to-use mounting solution - allowing you to maximise desktop space. Position your HP t5720 on your desktop, wall or under your desk and for total invisibility attach it to the back of any VESA compliant display including the HP L1706 Flat Panel Monitor (HP Quick Release sold separately).

Sleek yet hard-wearing chassis
Despite being less than 1/15 the overall size of a mini-tower, this compact solution features a heavy-duty inner metal chassis capable of supporting up to 10 kg. The stylish design not only looks great but no moving parts means low maintenance and totally silent operation.

Secure and simple to manage
Automated HP set-up and configuration tools as well as the integrated Altiris Deployment Solution mean establishing your client network is easy and it only takes a matter of minutes before you're ready to go. The integrated HP Sygate Security Agent offers optimum firewall protection against intrusions.

HP Compaq t5720 Thin Client

Operating system	Genuine Windows XP Embedded SP2
Browser	Microsoft® Internet Explorer 6.0
Processor	AMD Geode NX 1500@6W, 1 GHz
Memory	512 MB or 1 GB Flash, 256 or 512 MB DDR SDRAM (16 MB of system RAM is reserved for video graphics usage)
Video	SiS741GX Integrated/UMA graphics, 16 MB UMA graphics memory
Expansion slots	1 standard PCI slot (via optional expansion module)
Ports and jacks	2 USB 2.0 front ports, 4 USB 2.0 back ports, 1 serial, 1 parallel, 2 PS/2, 1 RJ-45
